NEW YEAR, NEW AND IMPROVED WS SERIES®

Riverside, CALIF., Jan. 15, 2020 – See Water, Inc., an industry-leading developer and manufacturer of innovative electronic pump control panels for water and wastewater operations, proudly announces the latest enhancements to its premium line of WS Series® control panels.

The new design features a larger NEMA 4X-rated enclosure, raised terminal blocks for ease of access, and an enclosed cable tray to separate and organize wiring inside the panel. These enhancements greatly streamline installation, troubleshooting and maintenance in all applications.

The WS Series® is available in simplex, duplex and triplex configurations for sewage, wastewater and dewatering applications. Simplex and duplex control panels support 120/208/240V single phase or 208/240/480V three phase pumps; triplex control panels support 208/240/480V three phase pumps.

The WS Series® is also available with intrinsically safe circuit extensions for simplex, duplex and triplex configurations in hazardous locations.

See Water's WS Series® control panels come standard with a clear front indoor/outdoor NEMA 4X-rated enclosure, IEC-rated contactors and motor protective switches. All panels are UL-listed for the United States and Canada and come standard with a five-year warranty.

The WS Series® is the proven solution and contractors' choice for sewage pump chambers, grinder pumps, sump pump basins and lift stations.
