SEE WATER, INC. LAUNCHES NEW ADDITIONS TO THE SENSOR PRO™ SERIES

Riverside, CALIF., Feb. 6, 2024 – See Water, Inc., an industry-leading manufacturer of pump control panels for water and wastewater operations, is proud to introduce new additions to its premium Sensor Pro™ Series - the Ultrasonic Pro™ Level Sensor, the Radar Pro™ Level Sensor, and two new intrinsically safe Transducer Pro™ Submersible Level Transmitters.

The Ultrasonic Pro™ Level Sensor combines an ultrasonic sensor, temperature sensor, ultrasonic servo circuit, and transmission circuit. The body of this sensor is IP67 rated waterproof, designed for long-term reliability, and is easy to install and maintain. This sensor is well-suited for non-foaming chemical, water, wastewater, and petroleum-based liquid applications.

The Radar Pro™ Level Sensor is a high-precision ultra-low-power millimeter-wave IP67 rated radar level sensor. It uses non-contact technology, eliminating the need for physical contact with the measured substance, which prevents contamination and minimizes maintenance requirements. This allows for the sensor to be used in a wide variety of applications, such as water processing, pump stations, stormwater overflow tanks, and level monitoring applications.

In addition to the new radar and ultrasonic sensors, See Water also offers a complete range of Float Pro® Control Switches and Transducer Pro™ Submersible Level Sensors. There are also two new intrinsically safe transducer models currently in stock and available for same or next-day shipping.

For more information about See Water's Sensor Pro Series, please visit www.seewaterinc.com or call 1.888.733.9283.

About See Water, Inc.

See Water, Inc. is an industry-leading manufacturer of pre-engineered and custom pump control panels for the HVAC, commercial, residential, utility and wastewater industries. For over 25 years, See Water has proudly provided solutions built from quality components that meet and exceed customer expectations. See Water is a UL 508A and 698A certified manufacturer headquartered in Riverside, Calif. Learn more about See Water's pre-engineered and custom control panels at www.seewaterinc.com.
