SEE WATER, INC. LAUNCHES NEW TRANSDUCER PRO™ SUBMERSIBLE LEVEL TRANSMITTER

Riverside, CALIF., May 23, 2022 – See Water, Inc., an industry-leading manufacturer of pump control panels for water and wastewater operations, recently expanded on its premium line of pump control accessories with the Transducer Pro™ Submersible Level Transmitter.

Transducer Pro™ is specifically designed to measure the liquid level in a wastewater or slurry tank referenced to atmospheric pressure. It maintains excellent chemical compatibility with its 316 stainless steel construction and an ETFE cable. This submersible level transmitter also comes with a large diameter 316 stainless steel diaphragm seal that is non-clogging and damage-resistant to floating solids.

Transducer Pro™ is equipped with a 270-pound tensile strength shielded and vented cable. Ventilation tubing in the cable automatically compensates for changes in atmospheric pressure above the tank. The vent is protected with a maintenance-free filter, which prevents particulate or water droplets from entering the transducer. The Transducer Pro™ comes standard with lightning and surge protection, and a two-year limited warranty.

For more information about See Water's Transducer Pro™ Submersible Level Transmitter, please visit <https://www.seewaterinc.com/product/transducer-pro> or call 1.888.733.9283.
