Single Phase Simplex Control Panel Installation and Operation Manual WS1P-TP-100X

WS Series® Simplex Control Panel

The WS Series® simplex control panels will control a pump in sewage, wastewater, and dewatering applications. All panels are UL Listed for the United States and Canada and come with a five-year warranty.

Model	FLA Range
WS1P-TP-1001	(0.0-7.0 FLA)
WS1P-TP-1002	(7.0-15.0 FLA)
WS1P-TP-1003	(15.0-22.0 FLA)
WS1P-TP-1004	(22.0-28.0 FLA)
WS1P-TP-1005	(28.0-36.0 FLA)
WS1P-TP-1006	(37.0-50.0 FLA)

Enclosure Mounting: NEMA 4X RATED

Mounting Brackets - A mounting bracket and screw pack are provided with the premium enclosures. To assemble, turn the enclosure upside down on a flat surface, place the mounting bracket over the square boss either horizontally or vertically, and fasten the mounting bracket with the $1/4''-20 \times 0.5$ SS, countersunk phillips drive screws or vertically, with the mounting brackets in any config., using any acceptable fastening technique.

Covers/Doors - Covers/doors have a gasket pre-assembled to seal against the base.

Note: The control panel should not be mounted in a location that may be subject to submersion.

Panel Installation:

- Caution: To maintain the NEMA 4X rating, make all wiring connections with seal tight cable grips or conduit connections.
- Run pump cables and floats cables through conduit. Make field connections as shown on wiring schematic.
- 3. Run power line conductor through conduit. Wire to terminals per enclosed schematic.
- Branch circuit protection to be provided by installer.
- 5. Panel circuit breakers are closed.
- Floats are properly mounted at the correct levels.
 Note: Floats shall have free range of motion without touching each other or other equipment.
- 7. Connect service conductors 120/208/240VAC to proper location.

SEE WATER, INC.

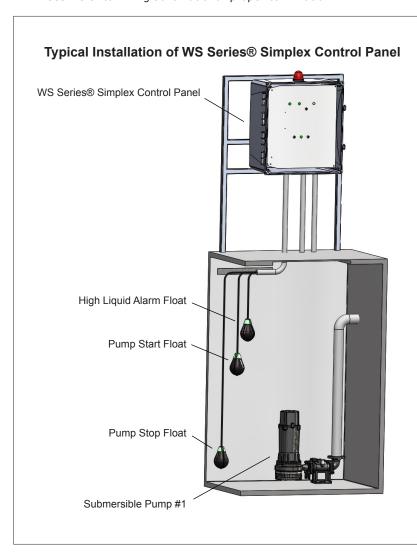

Single Phase Simplex Control Panel Installation and Operation Manual WS1P-TP-100X

Sequence of Operation:

- 1. When the 'Stop' and 'Lead' float contact closes, the pump will energize and the pump run light will illuminate. The pump will remain operational until the 'Stop' float opens.
- 2. If the level continues to rise, the 'High' float will alarm. This will illuminate the 360 degree visible beacon and sound an 85 decibel at 10' buzzer.

Remote Monitoring Dry Contacts:

Normally Open dry contacts for high level, pump run, and pump fault.
 Note: refer to wiring schematic for proper termination.

Additional Panel Options:

24 = Pump Exerciser

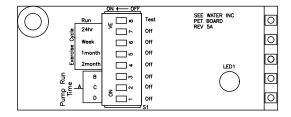

· Auto cycles pumps daily, weekly or monthly.

Run Time Options:

Position A: 50ms (DIP Switch 1,2, and 3)

Position B: 100msPosition C: 4s

· Position D: 8s

28 = Power On Dry Contact (Normally Open)

3R = Painted Steel Enclosure

A2 = Install overloads outside listed FLA range

AF = Alarm Flasher

AH = Anti Condensation Heater

C = Additional Cord Length Per Foot Per Component*

CC = Cycle Counter w/ LCD Display & Reset

CO = Convenience Outlet (User to supply 120 VAC)

D1 = 120V Dry Contacts

ET = Elapsed Time Meter w/ LCD Display & Reset

GR = Generator Receptacle, I ncludes Transfer Switch

IS = Intrinsically Safe

LAD/ = Lightening Secondary Surge Arrestor

LAW (LAD Delta / LAW Wye)

LL = Low Level Alarm

MD = Main Disconnect; Up to 100.0 FLA

PM = Phase Monitoring

PX = Pump Portal® Wireless Remote Communication

SF = Seal Failure Circuit w/ Indicator Lights
 SS4 = Upgraded Enclosure (304 Stainless Steel)
 SS6 = Upgraded Enclosure (316 Stainless Steel)

S3 = No Floats Option

*Additional cord length greater than 20': Specify after C. Example: WS1P-TP-1003-C50. Indicates 50' cord lengths for all floats.

Notes:

Troubleshooting:

Caution: Before checking electrical connections within the control or attempting to replace any components, turn off all branch circuits supplying power to the main control panel.

Alarm Circuit:

• To test the alarm light and buzzer, press the test button on the front panel. If either the light or buzzer do not indicate, replace the light bulb or buzzer with the same type.

Control Board and Fuse:

• If the power on light is not illuminating on the front panel, check the voltage at TS1-1 and TS1-2 with a voltage meter. The voltage should read 120VAC. If voltage is present, check the fuse in the fuse box. If the fuse is blown, replace fuse with same type. The dry contacts are rated for 0-60 VAC or VDC, 1 amp max.

Floats:

 The control board has individual float status indicators that will illuminate when the floats are in the closed position. Check floats for entanglement, full range of motion. Replace damaged floats.

Warranty:

See Water, Inc. warrants that products of its manufacture are free from defects in material and workmanship for a period of 5 years from the date of purchase. This date shall be determined by the date on the invoice and the serial number on the product.

Replacement of the product is at the discretion of See Water, Inc. This warranty is valid when the product is installed in compliance with the manufacturer's installation instructions. The manufacturer's obligation under this warranty shall be limited to the repair or replacement of any parts found by the manufacturer to be defective, provided that the product is returned to See Water, Inc.'s factory, postage prepaid with proof of original purchase included.

The manufacturer of this warranty shall not be liable under this warranty if the product has not been properly installed; any alterations/additions/changes to the product will result in a void warranty. Failure to properly install and test this product can result in personal injury or equipment malfunction.

See Water, Inc. shall not be liable for any loss, damage or expenses from installation or use of its products.
